Red Clay, Sandblasted

Golden Pattern

Black & White

A collection of approximately 12 ceramic cups arranged on a light brown surface. The cups are decorated with various colors and patterns. Some have a purple-to-white gradient with purple floral or geometric motifs. Others have a yellow-to-white gradient with yellow floral motifs. One has a red-to-white gradient with red floral motifs. Another has a teal-to-white gradient with teal floral motifs. The word "CUP" is overlaid in the center in a large, bold, black font.

Smart & Green Factory

Whole in One, Huge Improve on the SPACE

All production process will all in one production building, which will speed the production process, hundred containers stock space.

Digital Clay System

We buy semi-finish clay instead of finished clay from the supplier, which higher quality control by ourselves, GRS certificate apply possibility.

The Production Lines

Automatic jiggering, slip casting, glaze spray, electronic kiln (low, medium, high fire)

Sustainability

Solar energy, heat recycle system, speedy production line.....

Sustainability

• Energy Saving

New Factory Solar Energy

- Max 10,000 square meter. Start 2024, completed at 2026.
- Cover 50% - 80% of new factory production electric energy.

Kilns

- Electronic biscuit firing kilns from 2022.
- Energy saving 25% - 75% in biscuit firing.
- More energy saving kilns use in both new & current factory

New Factory Heat cycle

- Heat recycle system in the new factory.
- Not only production mold drying, but also drying for clay body and decal.
- Energy saving and Speeding production.

Other Saving

- Energy saving lamps, max 60% energy saving from 2024. New Factory

• Recycle

Leftover Material
about 20% of total production clay, 100% recycled back to clay supply chain.

Ceramics Waste
about 15% after glaze firing. Scrunched and 100% recycled to construction used material.

Semi-Finished Waste
about 3% of total Production clay, 50% recycled back to clay supply chain.

Ceramics Powder
Double scrunched from fired ceramics waste, 5% - 20% contained in "RECYCLE CERAMICS"

• Waste Reducing

Wasted Clay Pressing

Wasted clay recycling covered all production process, including clay body shaping, body repairing.

Purification of Sewage

100% Water collected & cleaning from all production process, all glaze collected as well.

Purification of Sewage

Waste gas from decaling production process was water flited, the wastes collected by the 3rd party.
